

# PRECISION VALVE REPAIR

CECO reconditioning extends the life of your old valves

CECO offers quality repair or replacement of your worn and damaged compressor valves, tailoring our service to your individual compressor and application needs. CECO's repair workforce boasts engineering and field expertise as well as a wide range of compressor experience in pipeline, gas, air, process and petrochemical. CECO's Precision Repair Centers located in Houston, and Odessa, Texas and in Walker, Louisiana will quickly return your valves to like-new condition.

## LIKE NEW CONDITION

Rather than spend precious budget dollars on new valves, CECO's valve repair service brings worn valves back to "like-new" condition. CECO carefully reconditions each valve to meet or exceed OEM specifications, extending the life of the valve and adding cost savings. Every reconditioned valve is thoroughly tested to ensure you receive

the quality service you have come to expect from CECO.

## QUICK TURNAROUND

CECO understands that compressor downtime can be costly. That is why we offer a 7-day turnaround on all valve repairs. Small shops without engineering expertise often only quickly clean up valves and pass them off as reconditioned.

The CECO Precision Repair center works directly with CECO's professional engineers through every step of the reconditioning process. CECO follows a strict set of OEM guidelines to return a valve to its original specifications.

***You can be certain that CECO will return your valve to meet or even exceed OEM specifications!***

## ENGINEERED QUALITY

CECO has been delivering OEM Superior<sup>SM</sup> products and services to the gas transmission, gas processing and petrochemical industries since 1964.

## Recondition Valves To "Like-New" Condition

- Substantial savings over cost of new valve
- 7-day or less turnaround
- Minimum downtime

## Magna-Flux Testing

- Reveals microscopic flaws

## Other "Like-New" Condition Parts

- Unloaders
- Regulators
- Packing cases
- Pistons
- Rods
- Cylinders
- Intercoolers
- Complete compressor units
